2 Approval minutes and action points

The minutes of the f2f (Pisa) SCCTC meeting of 8 October 2018 are approved.

3 Centre assessments:

a. CELR and BBAW certified

CELR has been certified as B-centre and BBAW has been re-certified as B-centre. There will be a news item on the website and in the newsflash.

b. update on new B-centre checklist: not done yet

Because of the current workload, a first draft is not yet available.

c. round 12 submission deadline: 30 November

For this round the previous version for the B-centre assessment will be used. With the few small additions we agreed on in Pisa.

The additional question that will be added to the new version of the B-centre checklist is: "Are you currently sharing other resources that are password or token protected than those offered as part of this a B-centre application? If so please specify why all the resources are not shared via the B-centre."

We have two candidates for the upcoming 12th round: PORTULAN and LINDAT. This question is not in the current checklist, however it will already be asked to these. Instead of making a change and adding this question to the current checklist we will ask the question in a separate email.

Concerning feedback on the CoreTrustSeal evaluation process: Some of the new centres already have CTS seals and documentation available. To get insight on how the evaluation goes you can contact one of these centres and look at the CTS documentation as listed at <https://www.clarin.eu/content/certified-centres>.
